EXPERIENCE

Senior UX Manager

Prominent Technologies

March 2026 – Present

Boulder, CO (Remote)

- Partner directly with CEO to advocate for the prioritization of design-centered changes, integrating business requirements and user feedback into product direction across Engineering, QA, and Business Analysis
- Design and prototype AI-powered workflows and scaled support solutions for enterprise clients, applying system-level thinking to translate complex operations into intuitive, personalized user journeys
- Communicate the user experience at every stage through flow diagrams, storyboards, and high-fidelity prototypes, driving cross-functional alignment and ensuring consistent, high-quality design execution

Lead Product Designer

Evernorth Health Services (Cigna)

April 2022 – April 2026

Boulder, CO (Remote)

- Designed intuitive, proactive user journeys for Broadstreet, an enterprise healthcare platform serving 100K+ users at a Fortune 15 company—translating complex clinical operations into seamless human-centric interfaces that reduced manual search effort by 90%
- Developed a multi-turn generative AI conversational agent, crafting interaction patterns that surface information progressively across automated and human-led support touchpoints
- Integrated user feedback and business requirements into ongoing updates through research, personas, journey maps, and flow diagrams—advocating for user voice across product, engineering, and clinical teams

Senior Data Visualization Designer/Developer

Horne, LLP

April 2021 – April 2022

Austin, TX (Hybrid)

- Designed scaled support solutions for a \$300M FEMA program, translating complex backend data operations into clear, decision-ready interfaces for thousands of applicants across three states
- Applied user-centered design principles and WCAG accessibility standards to constrained toolsets, prioritizing clarity and actionability for non-technical users
- Communicated design decisions through flow diagrams and storyboards, integrating stakeholder feedback and business requirements into iterative product updates presented to program leadership

CORE COMPETENCIES & TOOLS

Design & AI: Figma, Figma Make, Wireframes, Prototyping, Generative AI, Conversational UI, Claude

Methods & Tools: Agile, Cross-functional collaboration, User research, Journey mapping, WCAG, SQL
